

Factsheets

Special Issue – Learning from Home
A fun way to learn about or revise energy
April 2020

planete
energies

An initiative by  **TOTAL**
FOUNDATION

In this difficult period of lockdown, Planète Energies is offering factsheets on energy-related topics to help make learning and revising fun.

On each factsheet, you will find a short video with a game or exercise related to the topic covered.

All content is organized by level:

- elementary,  Exploring
- Intermediate  Tell me more
- advanced.  Going in depth

On its website, Planète Energies also offers a range of media (infographics, videos, reports, close-ups, slideshows, etc.) all about energy. These are aimed at giving young people and their teachers and parents key facts on all types of energy, as well as how they can be used responsibly.

The site is packed with content, with even more on Twitter or on Planète Energies' YouTube channel.

Digital and Everyday Energy

→ <https://www.planete-energies.com/en/medias/feature-reports/factsheet-digital-and-everyday-energy>

The digital sector accounts for between 3% and 4% of global energy consumption, and digital equipment and connected devices are becoming more and more widespread. Find out how to balance digital and energy consumption:

Learn or revise by watching the video
